

# Global Wave is Getting Stoked

## STOKE IS ~

The world's first Sustainability certification body with standards built specifically for Surf and Ski tourism operators, destinations, and affiliated events!

### Why STOKE certified?

Because events can be examples for better systems/standards, and Global Wave is committed to being that kind of example.

We are doing our best to implement better systems and take accountability for our impacts, and you can help!

# 6 Stream Waste Management

➤ Organics

➤ Compostables

➤ Nev/POPP House

➤ Tomra

➤ Co-mingled Recycling

➤ General Waste/Landfill

# International Carbon Offset Partner:

- ❖ [SeaTrees](#) support Blue Carbon Projects that regenerate coastal ecosystems, by drawing down carbon from the air, increasing biodiversity, creating jobs and sustainable communities.
- ❖ “By restoring, replanting and protecting coastal ecosystems around the world through our core conservation partners - SeaTrees is supporting the 17 United Nations / Sustainable Development Goals (SDG's), which is one of the ‘blueprint’s’ for transforming our world for good by 2030.”

#OceanPositive Impacts

# How to Offset your Travel With

- ❖ We ask that you take ownership of your travel impact by purchasing a [SeaTrees Token](#)
- ❖ This token will offset your travel impact relative to how far you are traveling, by supporting these 2 projects:
  - [Mangrove Project Biak Island, Indonesia.](#)
  - [Southern Cardamom Forest Cambodia](#)
- ❖ Only one of these projects is traditionally carbon certified, but both are impeccably run and entirely impactful.
- ❖ SeaTrees is donating 20% discount codes to ALL GLOBAL WAVE ATTENDEES!
  - Discount Code: **GLOBALWAVE2020**

# Landcare Australia

[Landcare Australia](#) has been empowering communities across Australia in rural and coastal care projects, that support ecosystem restoration and management.

We are donating to their [Bushfire Relief Aid](#) which supports communities and land affected by the fires raging these last several months.

Please donate what you can, as an homage to our host country, and those doing all they can to support communities and country.

Landcare Australia is not a certified Carbon Offset provider, yet their approach to change is a “bottom up”, systems model, and has proven to be incredibly effective. Regeneration of land practice is a valued part of carbon sequestration, and we are proud to support them in the wake of these fires.
